HOW TO CLEAN YOUR ALL THINGS ACRO GREY PANEL MAT:

Keep your mat clean, fresh, and ready for training with this simple routine!

STEP 1: REMOVE LOOSE DIRT

Sweep or vacuum the mat using a soft brush or hard-floor setting to remove dirt, dust, hair, and debris.

STEP 2: MIX YOUR CLEANER

Use warm water + a small amount of mild dish soap OR a pH-neutral cleaner that is safe for vinyl.

WHAT IS A PH-NEUTRAL CLEANER?

A gentle cleaner with a pH close to 7. It is designed to clean without being overly acidic or alkaline, making it a safer choice for regular cleaning of vinyl surfaces.

Example: A mild, pH-neutral floor cleaner such as Bona Hard-Surface Floor Cleaner can be used, provided the specific product label confirms it is suitable for vinyl.

NO BLEACH

NO AMMONIA

NO HARSH CHEMICALS OR SOLVENTS

NO ABRASIVE CLEANERS

STEP 3: WIPE IT DOWN

Use a soft microfiber cloth or mop. Work in small sections and gently wipe away dirt and sweat.

STEP 4: SPOT CLEAN

For stubborn spots, use a soft cloth with your mild cleaning solution. Avoid abrasive scrubbers that can scratch the vinyl.

STEP 5: RINSE & DRY

Wipe with a clean, damp microfiber cloth to remove any cleaner residue, then allow the mat to air dry completely before rolling or storing.

✨ **PRO TIP:** Regular cleaning helps remove dirt and grit before it can build up or cause unnecessary wear on your mat.

⚠️ **Always test any new cleaning product on a small, inconspicuous area first and follow the cleaner manufacturer's instructions.**

HOW TO CLEAN YOUR VELCRO

STEP 1:

Use a fine-toothed metal comb, an old stiff toothbrush, or a wire pet slicker brush to gently remove hair, lint, dust, and debris trapped in the Velcro. Work in one direction and avoid pulling or snagging the Velcro loops.

STEP 2:

Use the "Tape Trick" by wrapping heavy-duty duct tape around your hand with the sticky side facing out. Press the tape firmly into the Velcro hooks and pull it away quickly to lift out the loose smaller fuzz and dirt.

STEP 3:

Use tweezers or a toothpick to pluck out the remaining pieces.

STEP 4:

Fluff the nap - Gently rub an old toothbrush in a circular motion across the soft fabric. This raises the matted fibers back up so they can lock onto the hooks again.

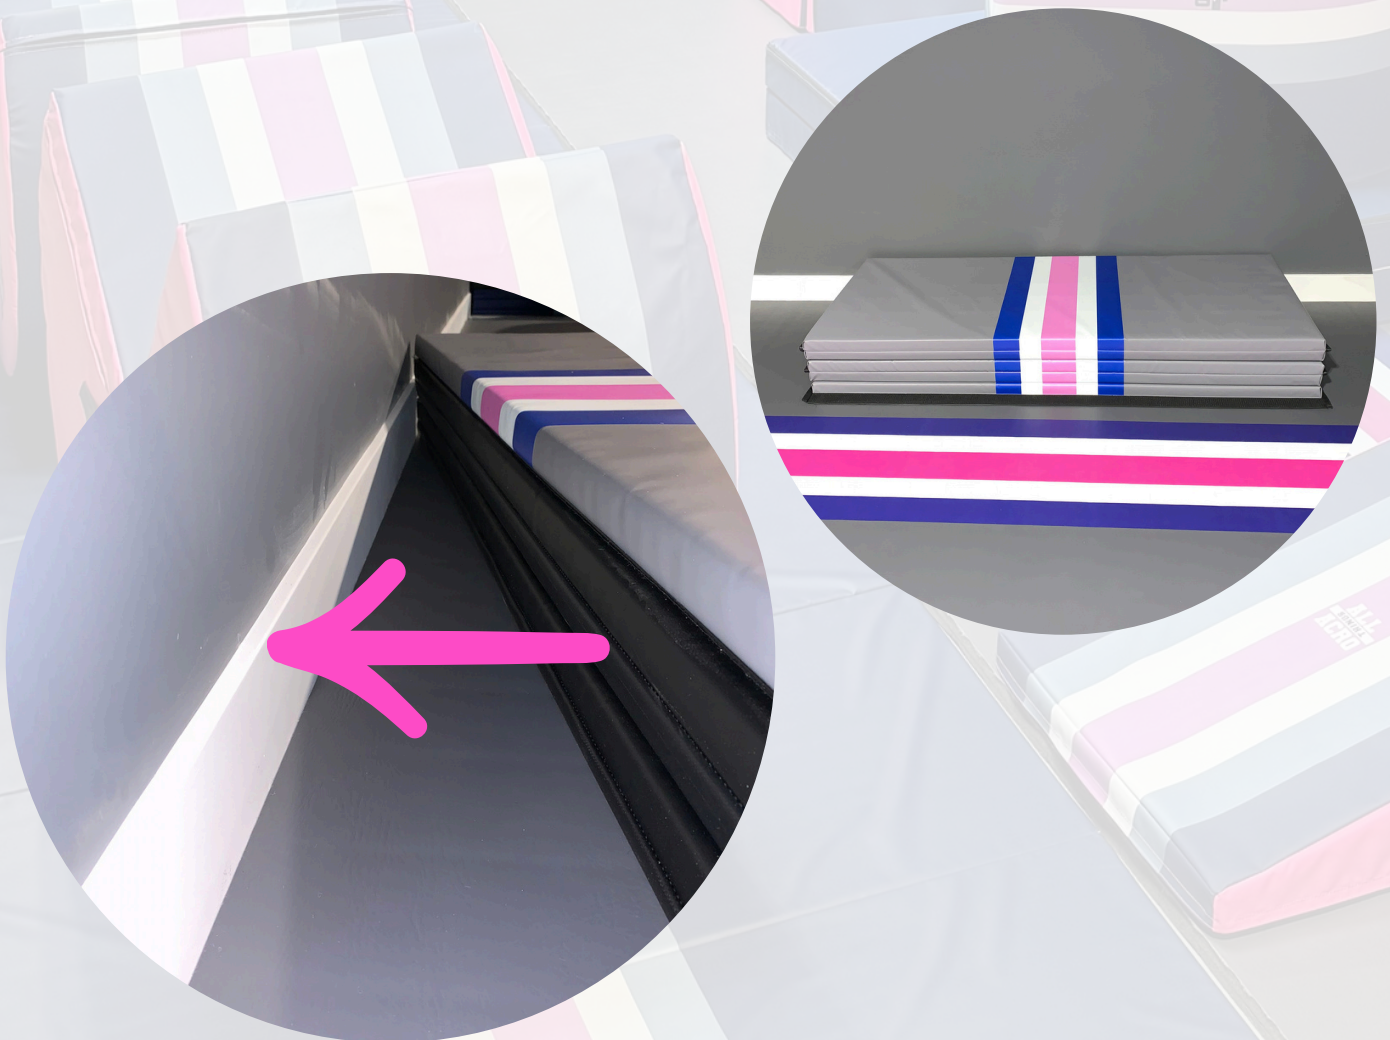

YOU MAY NOTICE

Slight creasing in the cracks of your mats over time with use. This is a natural part of All Things Acro mat usage - because the paint needed to make the technical hip width and shoulderwidth markings is slightly thicker than vinyl material causing it to pull slightly when folded. When the mats reopen this crease will be in the seams.

To maximize the longevity of your mats avoid peeling or picking at any seams in the mat when they are folded, as seams will kiss together again once opened.

HOW TO STORE YOUR MATS

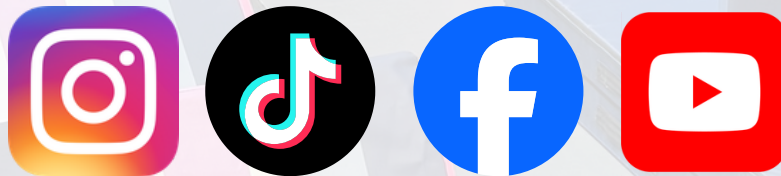

Store your mats indoors, in a climate controlled environment. Vinyl can melt in extreme heat and shrink in extreme cold. Keep the seams/stripes of the mat stored facing fowards (black side to the wall) to avoid them frequently rubbing against the wall and causing damage to the painted on technical markings.
